During 2009 the **Emergency Management** division was busy leading the coordination of planning efforts for the H1N1 (swine flu) pandemic that was federally declared a national health emergency. This planning effort developed and organized the County's plans and response to the pandemic that included mass immunizations, physician and community education, volunteer and resource management, surveillance of community illness, conducting exercises and the vaccination of first responders throughout the county.

There were 64 weather events for Fayette County which ranged from Alerts for significant weather with Heavy Winds and Rain to Tornado Warnings and 3 Flood Warnings.
